

MARINE ELECTRICIAN

Ocean Choice International, one of Atlantic Canada's most diversified seafood companies, producing and marketing a full range of shellfish, groundfish and pelagics species throughout the world, is presently accepting applications for the position of Marine Electrician as part of our Atlantic Fleet Operations Group located in the St. John's Office.

Reporting to the Director of Fleet Operations the individual must have working knowledge of procedures, strong mechanical aptitude and ability, and be able to follow directions. Experience in the understanding of shipboard electrical distribution systems and the ability to troubleshoot and repair shipboard electrical systems, equipment with specified technical information, 600 VAC or less are necessary requirements.

ESSENTIAL QUALIFICATIONS, DUTIES AND RESPONSIBILITIES including but not limited to the following.

- Demonstrate thorough knowledge of various tools and test equipment used for installation, maintenance, operation and troubleshooting of electrical systems.
- Must demonstrate ability to interpret and work from owner supplied drawings, job specifications, instruction manuals, manufacturer's handbooks, change order, and contract specifications.
- Will be required to update daily work packages, read and use schedules and sign for completed work/inspections on QA records.
- Test internal circuits of major units of electrical equipment for continuity, short circuits, and grounds and measure electrical quantities and compare with established values. Inspect trip shafts, toggle linkages and all other mechanical parts to see that they operate freely without binding. Inspect mechanical and electrical connections including mounting bolts and screws; draw out disconnect devices and control wiring.
 - Detect and locate grounds, open circuits and short circuits in distribution generators and systems.
 - Maintain and repair Radars, Navigation equipment, circuits, and other associated Marine equipment.
 - Familiarity with and ability to diagnose and repair logic control systems as used in marine operating systems is essential.
- Install new power and lighting circuits.
- Use appropriate sections of IEEC, DNV, TP127E and manufacturer's tech manuals and ship's information book in repairing electrical equipment and installing electrical equipment.
 - Must be familiar with all safety procedures pertaining to or where to obtain electrical procedures.
 - Develop and deploy and follow lockout/tagout procedures for work being performed.
 - Work in full compliance with quality, safety, environmental and health regulations.
 - Ability to work any assigned shift and ability to work assigned overtime.
 - May be assigned tasks outside Atlantic fleet as required.

Combination of education and experience will also be considered.

Salary will be commensurate with qualifications and experience. OCI offers excellent benefits package including health and pension plans.

Interested persons please forward resumes in confidence to hr@oceanchoice.com or mail them to the address below.
